

MOBILE BALLISTIC SHIELD:

Product #: GMBSS, GMBSH, GMBSF

SOLID

HALF LITE

FULL LITE

Mobile ballistic shields have been used by military, nuclear and government agencies for years effectively setting the standard for portable security solutions. The engineering provides maximum protection from active shooters and terrorist threats in environments where permanent ballistic system installation is limited. The advantage of these panels is that they can be readily moved to areas that require added security and protection and take up little storage space when not in use. Available in three models and two sizes.

- Size : 48"x74" and 32"x74" (custom sizes available upon request)
- Bullet resistant UL Level 3 - 8 (specify when ordering)
- Armored steel and/or bullet-resistant glass construction.
 (Acoustic fabric on protected side of solid model only)
- Four heavy duty 5" steel lockable casters
